DEBI UMBARA
Fullstack Web Developer
Jakarta, Indonesia | +62 817-78-5006 | umbara81.dev@gmail.com | LinkedIn (URL) | Portfolio (URL)

SUMMARY

A dedicated career switcher with 6 months of intensive web development bootcamp experience, specializing in frontend and fullstack development. Proficient in building responsive and scalable web applications using modern technologies such as React, Next.js, and Express.js. Backed by 10+ years of professional experience across IT, operations, and management roles, bringing strong problem-solving, analytical thinking, and cross-functional collaboration skills.

WORK EXPERIENCE

Career Transition – Web Development Bootcamp
Web Developer Trainee *(Jul 2025 – Feb 2026)*

- Completed an intensive 6-month bootcamp focused on frontend and fullstack web development.
- Developed multiple real-world applications including e-commerce, booking systems, and web platforms.
- Built responsive and dynamic user interfaces using React.js, Next.js, and TailwindCSS.
- Developed backend services and REST APIs using Express.js and PostgreSQL.
- Collaborated in team-based projects using Git & GitHub following version control best practices.

PT Alita Praya Mitra
Multiple Roles *(Jan 2009 – May 2025)*

Logistic & Demand Management, HSSE Officer, Risk Management Officer *(Nov 2023 – May 2025)*

- Managed logistics planning and demand forecasting to ensure operational efficiency.
- Conducted risk assessments and implemented mitigation strategies across operations.
- Monitored HSSE compliance to maintain safety standards and regulatory requirements.
- Coordinated cross-functional teams to align operational and safety objectives.

HSSE Officer *(Jan 2019 – Oct 2023)*

- Implemented health, safety, security, and environmental policies across projects.
- Conducted audits, inspections, and incident investigations to improve workplace safety.
- Ensured compliance with regulatory standards and internal safety procedures.
- Delivered training and awareness programs to promote a safety-first culture.

Procurement Supervisor *(Sep 2015 – Dec 2018)*

- Led procurement processes including vendor selection, negotiation, and contract management.
- Optimized purchasing strategies to reduce costs and improve supplier performance.
- Maintained strong relationships with vendors to ensure timely delivery of goods and services.
- Monitored procurement activities to align with company policies and budgets.

IT Supervisor *(Apr 2010 – Aug 2015)*

- Supervised IT operations including system maintenance, troubleshooting, and user support.
- Improved system reliability and performance through proactive monitoring and upgrades.
- Coordinated IT projects and collaborated with stakeholders to deliver technical solutions.

- Managed IT assets and ensured proper documentation and system governance.

Material Planner *(Jan 2009 – Mar 2010)*

- Planned and managed material availability to ensure smooth operational processes.
- Forecasted demand and maintained optimal inventory levels.
- Coordinated with internal teams to support production and operational requirements.
- Reduced risks of stock shortages and overstock through effective planning.

PT Telkom Indonesia
Sales & Marketing *(Aug 2006 – Dec 2008)*

- Executed sales strategies to acquire new customers for postpaid services.
- Promoted products and provided customer consultation to increase adoption.
- Achieved sales targets through direct engagement and relationship building.
- Maintained customer satisfaction and handled service-related inquiries.

PROJECT EXPERIENCE

Event Management Platform (Fullstack)

- Situation: Event organizers needed a centralized system to manage events and transactions.
- Task: Build a scalable event management platform.
- Action: Developed a fullstack application using React.js, Next.js, Express.js, and PostgreSQL.
- Result: Delivered a functional platform with ongoing improvements for high scalability (target: handling up to 1M concurrent users, implementing Redis, Docker, and system optimization).

Laundry Web App (Fullstack)

- Situation: Laundry services relied on manual processes that reduced efficiency.
- Task: Create a digital solution for order and service management.
- Action: Built a web app with features such as order tracking, service management, and user interface.
- Result: Improved operational efficiency and simplified customer interaction; currently under enhancement for scalability and performance.
